Dyspepsia Proof. Much is said about American dyspepsia, but there is one native race of America that is certainly not greatly troubled by the modern curse. The sturdy little Eski-mos defy all the laws of hygiene and thrive. The Eskimo, like the ordinary dweller in America, cats until he is satisfied, but

there is this difference—that he never is satisfied while a shred of the feast remains

unconsumed. His capacity is limited by the supply, and by that only. He cannot make any mistake about the manner of cooking his food—for as a rule he does not cook it—nor, so far as the blub-

ber or fat of the arctic animal is con-cerned, about his method of cating it, for

he simply does not eat it. He cuts it into

long strips an inch wide and an inch thick

and then lowers the strips down his throat as one might lower a rope into a well.

from indigestion. He can make a good meal off the flesh and skin of the walrus,

provision so hard and gritty that in cut-ting up the animal the knife must be con-

tinually sharpened.

The teeth of a little Eskimo child will

meet in a bit of walrus skin as the teeth of an American child would meet in the flesh

of an apple, and that when the hide of the walrus is from half an inch to an inch

and a half in thickness and bears considerable resemblance to the skin of an elephant.

The Eskimo child will bite it and digest it,

oo, and never know what dyspepsia means.

Bucklen's Arnica Salve.
